

1 DEVELOP AN INTERNATIONAL TRAVEL POLICY
Before employees travel, educate them on how to find help and what kind of services are available. Hint: there's an app for that.

2 MIND YOUR INSURANCE GAPS
Business travel accident policies don't typically cover medical/dental emergencies, Rx, medical evacuation or access to a global network of providers.

3 SOLVE FOR MEDICAL EMERGENCIES
Socialized medicine in some countries won't be available, and your international healthcare benefits may not cover crisis assistance like rescue services and safety plans.

4 REVIEW YOUR PROGRAM ANNUALLY
Your business travel requirements evolve, as do global safety and medical needs. Review your policies at renewal time to ensure maximum protection.

4 CAUTION SIGNS FOR WORK TRAVEL ABROAD

Keep your employees
safe with international
healthcare benefits
and security services.
